## **DETAILED ACTION**

### ***Response to Pre-Amendment***

1. The present Office action is made in response to the pre-amendment filed on 4/12/2005. It is noted that in the Pre-amendment, applicant has canceled all original claims 1-32 and added a new set of claims, i.e., claims 32-60, into the application. The newly-added claims 32-60 are subjected to the following restriction.

### ***Election/Restrictions***

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 33-34, 44-47 and 60, drawn to an apparatus and a method for imaging light from a specimen wherein the apparatus and the method comprises a shutter system for controlling light from a light source system to the specimen or from the specimen to an image capture device.

Group II, claims 35-38 and 50-56, drawn to an apparatus and a method for imaging light from a specimen wherein the apparatus and the method comprises a scanning system for controlling the focus of the scanned light on the specimen.

Group III, claims 39-41 and 57-59, drawn to an apparatus and a method for imaging light from a specimen wherein the apparatus and the method comprises a light source system wherein the number of light sources and/or the number of

Art Unit: 2872

wavelengths emitted from the light source system are controlled by a control system.

3. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical features of the structure recited in one invention is not recited in other invention, and thus all groups of inventions I-III do not have a single general inventive concept.

4. It is noted that claims 32 and 48 are generic claims, thus these claims will be examined with the claims of the elected invention.

5. A telephone call was made to William M. Lee, Jr on 9/26/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
